

Strength&Fabric

Vinyl

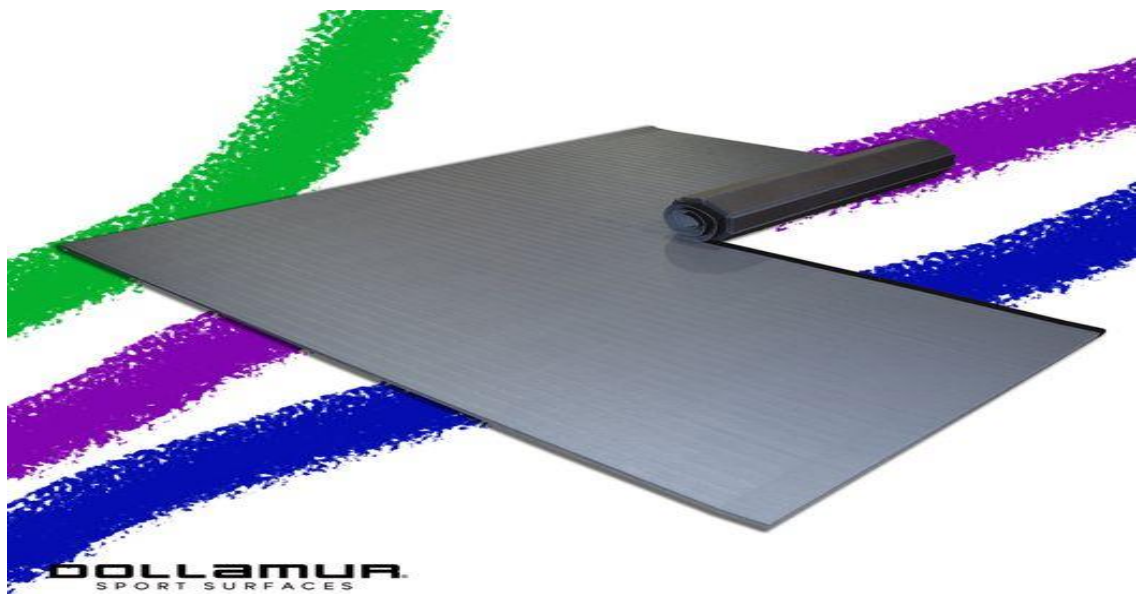

For Dollamur roll mat, we use the extra tough and tensile vinyl which been purchased from Europe. The vinyl is wear-resistant, non-slip and never crack and peel off.

For Surface, we provide two options for you: Tatami Vinyl and Smooth Vinyl.

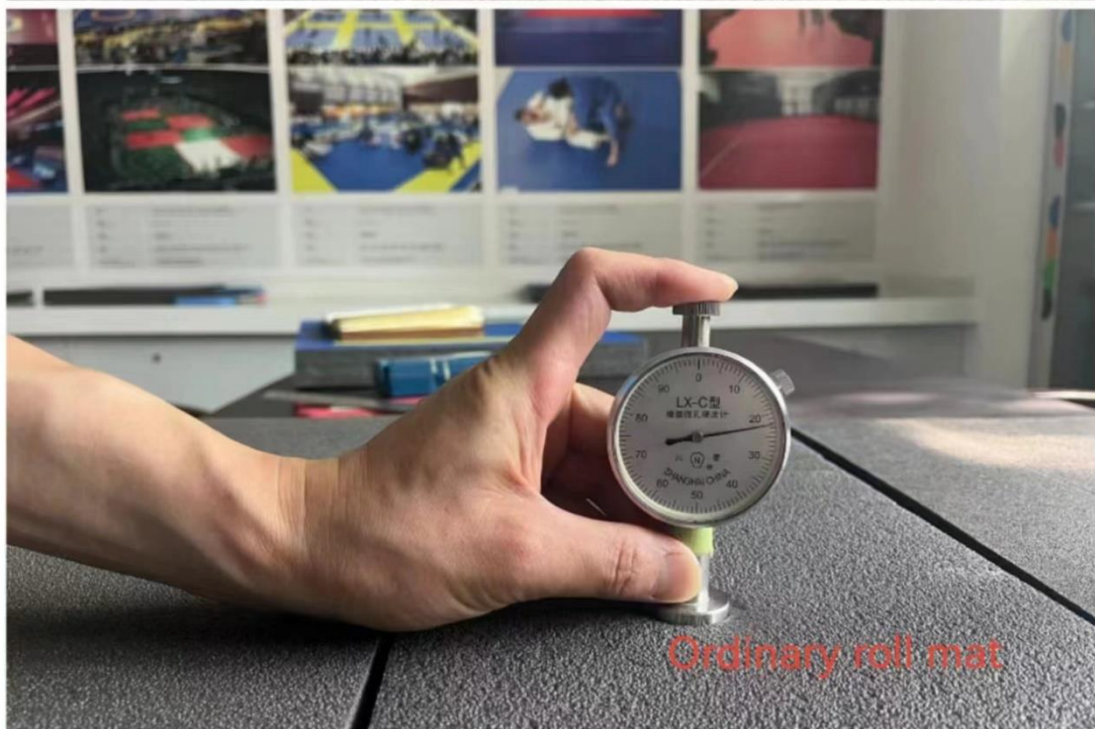

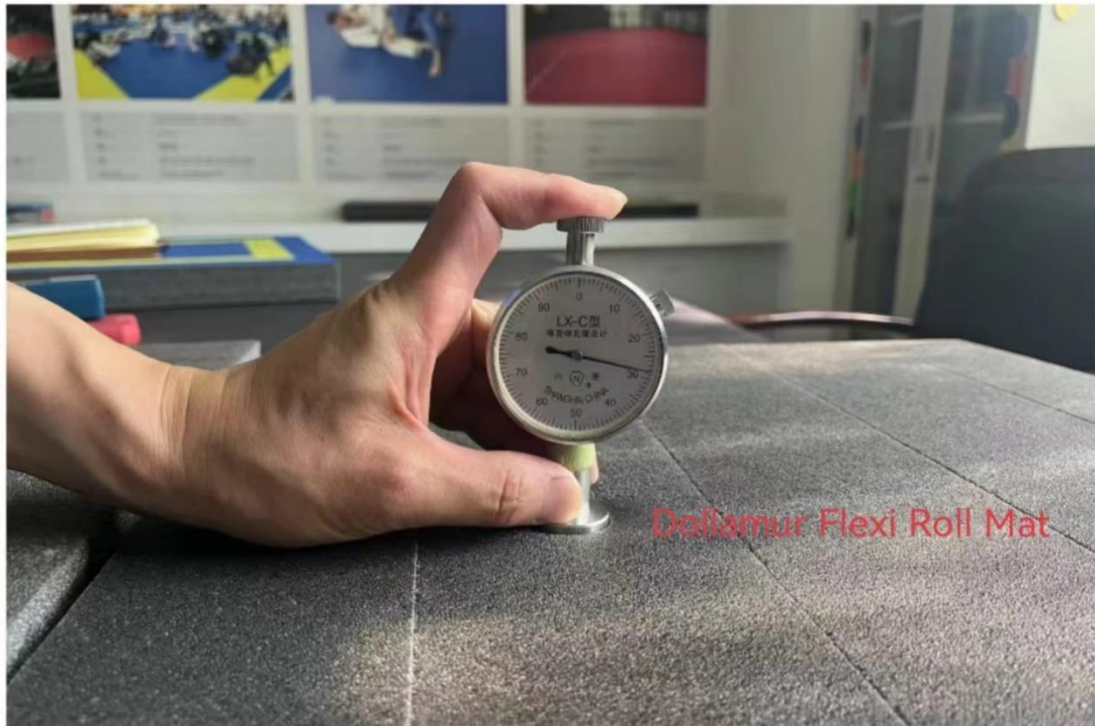

Foam

Dollamur Flexi Roll Sports Mat uses high-density cross-linked foam. The cross-linked polyethylene closed cell foam not only provides extreme shock absorption, but also makes the foams never stiffen or shrink.

Compared with ordinary foam, our foam can accurately reach 30 rate, and has good tensile, sound insulation, shock absorption, sound absorption and other characteristics.

In addition, for different sports items, according to their different sports feature and technical needs, we use different rates of foam. We strictly control the foaming density, which other manufacturers can not precisely control.

Indestructible Bond

We use the eco-friendly bonding technology laminates vinyl together and never separate.

Flexi Connect

For Dollamur roll mat, which is joined with patent technology-Flexi Connection. We glued the hook and loops to the mat with colorless and odorless American 3M glue sticks by artificial. It's firm so that you can disassemble for many times.

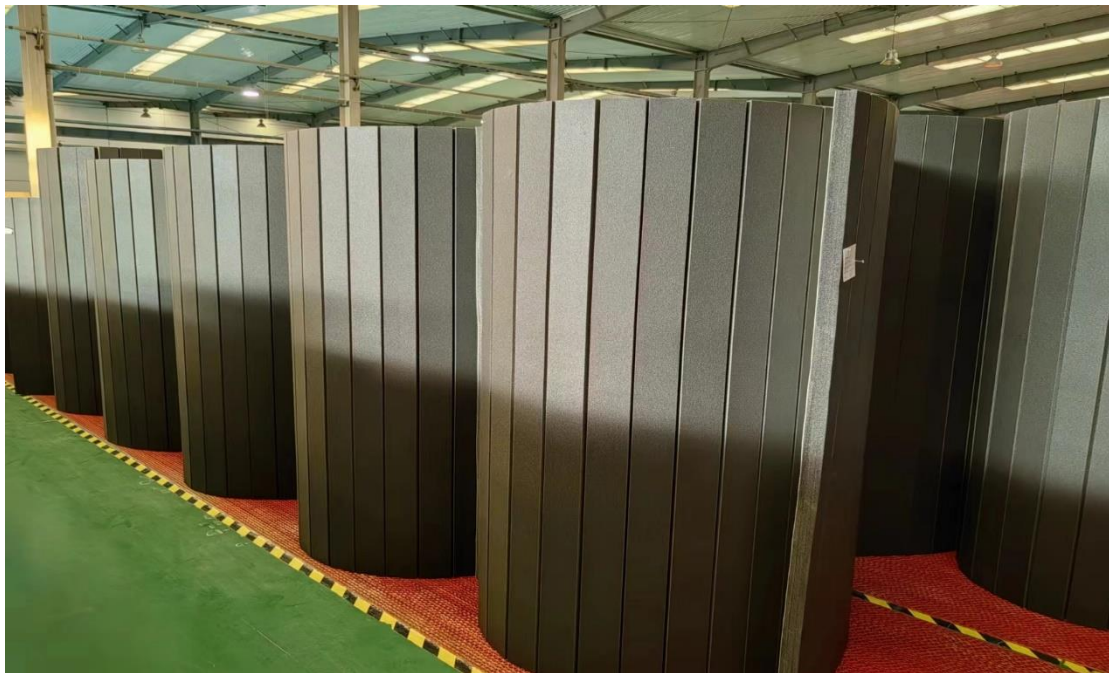

1.

The Most Advanced Water Jet Technology In The world

We use high-precision water cutting technology to create slices in the foam, which keeps the original foam of the mats during the processing period and make the mats to be easily rolled up and take down. Precision technology makes the compact connection, which is the 1/10 of the diameter of the hair. Not like traditional Gear Cutting, destroyed the physical properties of foam.

Mat logos&Lettering

Customize your mat with your logo and lettering in any PMS color. The Dollamur Art Team will reproduce your logo by hand or with Dollamur Digital printing.

Dollamur Digital is the most advanced direct to surface printing technology on the market. Dollamur proprietary ink dries instantly and can endure the most demanding workouts.
